

Become a cloud spotter

Becoming a cloud spotter can be a relaxing activity and a chance to learn about the weather. Remember when you are looking up at clouds take care to not look directly at the sun and wear sunglasses to keep the sun out of your eyes.

Step 1: go to your local park or green space

Step 2: find a spot to look at the sky

Step 3: what types of cloud can you see?

- Cirrus (high wispy clouds)
- Cumulus (fluffy white clouds)
- Cumulonimbus (tall grey rain clouds)
- Stratocumulus (large flat grey clouds)

Step 6: sketch some of the clouds that you see

Step 5: what other objects can you see in the clouds?

Step 4: what animals can you see in the clouds?
