

# Build a bee hotel

Building a bee hotel is a great way to encourage insects into your garden. Take care when using cutting tools and get an adult to do this if it's too difficult.

## Step 1: collect materials.

- Bamboo canes
- Sticks
- Dry grass
- Hollow stems
- Cans
- Old bottles

## Step 2: cut lengths of bamboo and sticks.

## Step 3: put the bamboo into your container.

## Step 6: hang up and wait for insects.

## Step 5: tie on some string.

## Step 4: hay or straw can be used to fill in gaps.
