

Signs of Summer

As the days begin to lengthen and temperatures start to rise, our parks and green spaces are busy with wildlife. Animals are collecting food, producing offspring and plants are flowering. Why not get out whilst the weather is good and have a look and listen to see if you can spot these signs of summer.

Trees full of leaves.

Butterflies fluttering between flowers.

Badgers digging for earthworms.

Wildflowers in full bloom.

Barn owls hunting in the evenings.

Insects busily collecting food.
